2019 Oct - 2021 Mar

Ministry Of Energy And Natural Resources | Ankara/Turkey
Software Specialist

- Online Education Portal: Written in .NET CORE MVC. I was one of the 2 people who wrote the project that we developed from scratch.
- Subscriber Net Web Api: For the Mobile Application of the app, I wrote a xml service and .NET CORE api that sends requests to visual basic from C# going to the api via xml service.
- Expenditures and Inventory: This is a project I wrote from scratch with React Hooks.
- Material Technical Evaluation: Developed with React Hooks and Material UI.
- Armature Project: It is a project that I consulted with fellow software developers. It uses React Hooks and Material UI.
- Robot Arm Work: I made a project that instantly detects human movements and transfers them to the robot arm with Kinect + Arduino UNO and Robot Arm.
- R&D Procurement Application: A software that controls the product tracking, delivery and procurement process for the R&D projects carried out in our institution. I wrote it with React Hooks and React Strap.

2017 Oct - 2019 Oct

Advancity | Sakarya/Turkey
Software Developer

- ALMS PLUS: I took an active part in the project that we developed with React and .Net Core. Both on the front end and on the api side.
- ALMS : I have worked in this software which is used by more than 70 universities and more than 120 institutions and organizations for distance education purposes. .Net Mvc, Knockout, JQuery, Mssql are used. I also made Telegram Integration to this project.
- ALMS SYNC: Students, trainers, courses, etc. I took part in the development of this software which is also known as the synchronization tool of ALMS which performs the process of receiving and sending data from the database of the institution by connecting to SOAP or Rest Services containing information. Asp .Net technology was used.
- CORPORATE TUBE (ATUBE): A Mvc project designed for institutions to watch the trainings as video and download the document, Vue.js was used on the front side of the project and I made active development on both the front side and api side of the project. I also made api integrations, Kaltura integration, Vimeo integration to the project. ASOYS: I took part in the active development of this project, which was made using JQuery and Mvc

2015 June - 2015 Oct

Aytaş Mobilya | Sakarya/Turkey
Software Developer

- Company-oriented adaptations were made in the Harmony Erp program.
- An intermediate layer has been added to the mrp module.
- Product updates were made to Divanmobilya.com and Sihirlisehpa.com websites.
- Android slider was made for product promotion.

2012 Sept - 2013 Sept

Voipzeker | Sakarya/Turkey
Software Developer

- The company is a Dutch company and web projects were developed in the office in Sakarya.
- Facebook-style site was created. A web project was developed to use the site selling voip phones. (www.voipzeker.nl and www.sharecontact.nl)
- My task on the Voipzeker site was to prepare the admin panel and I added applications such as to do list and calendar to the site.
- Sharecontact site was a project written as a phone book for voipzeker customers.
